WHO WE ARE

What is Cloud Identity Summit?

The Cloud Identity Summit is a free, community-focused conference centered on cloud identity management. It brings together experts to explore key topics like identity protection and management but also trend topics such as password less authentication or non-human identities. The event fosters collaboration and knowledge exchange among international attendees from diverse industries.

The Cloud Identity Summit is organized by three Microsoft Most Valuable Professionals (MVP) who also lead the Azure Meetup Bonn. With years of experience in community event organization and as active speakers themselves, they bring valuable insights from both perspectives to ensure maximum attendee value.

Motivated by a commitment to community, the event offers an engaging format focused on identity management and security topics, providing the perfect opportunity to connect with and learn from identity experts.

CONTENT AND GOAL OF THE EVENT

Learning from world-class speakers

Present your brand directly to the specialists
The Cloud Identity Summit attracts top-tier talent and decision-makers by featuring renowned speakers, including Microsoft MVPs and global security architects. By sponsoring, you position your brand alongside high-caliber content that drives the future of identity management. This is your opportunity to showcase your solutions and services in front of an audience eager for expert insights and cutting-edge solutions.

Networking with the Community and Partners

Direct access to your target audience
We bring together a highly engaged community of identity professionals, security architects, and technical leaders who are seeking new solutions and partnerships. Sponsoring gives you the opportunity to establish connections in our exclusive expo area.

Open Discussions and Exchange

Engage with Real-World Challenges.
Our format offers interactive panels and open roundtables, creating a dynamic environment where attendees actively discuss their current pain points and technical hurdles. As a sponsor, this is an invaluable opportunity to hear directly from the community feedback and current challenges that exist in the market.

Become a supporter of Cloud Identity Summit

The Cloud Identity Summit was established with a clear objective: to create a professional, open forum for deep technical exchange on an equal footing and genuine connection within the identity management field. Organized by community leaders and Microsoft MVPs, our goal is to bring together architects, engineers, and security specialists to share knowledge and solve complex challenges collaboratively.

Partnering for the Community

Support from our partners is essential to this mission. As a community-driven initiative, we are committed to keeping the event accessible to ensure that the focus remains on expertise and education rather than commercial barriers. Your sponsorship directly enables the infrastructure for high-quality sessions and networking, fostering an environment where professionals can grow and the industry can advance.

Join Us

We invite you to partner with us in supporting this specialized community. By contributing to the Cloud Identity Summit, you are actively investing in the professional development of the sector and engaging directly with the experts defining the future of identity security. We look forward to discussing how we can collaborate to make this exchange possible.
